Per highlight briefing during a recent staff visit relative to the work that AMS and this office has done with ARO, it has been mutually agreed that the data necessary for further discussions on the LOX system will not be complete prior to approximately 21 or 22 March. [ ] and I have tentatively scheduled a trip to [ ] and tentatively established 26 March as a date to sit down with [ ] and his immediate staff to brief them on comparative data being collected by ARO at that time. Considerable efforts by AMS, ARO and myself have been in the mill without the knowledge of Lockheed, [ ] or any other activities and think it appropriate at this time to confine further discussions, conferences, etc. to the aforementioned people. I briefly discussed our program with [ ] 6 March 1969.
